

AGRECO Equivalence Standard – AES

Part I **V3**: BASIC RULES

The AGRECO Equivalence Standard – AES represents the normative rules for organic certification applied by AGRECO in countries outside of the European Union (Third Countries - TC). It is split up into **two** parts, makes reference to the relevant EU legislation and evaluates the rules to be applied in Third Countries to be either COMPLIANT or EQUIVALENT to the EU-norms.

Part I represents the BASIC RULES and makes reference to the COUNCIL REGULATION (EC) No 834/2007.

Part II represents the IMPLEMENTING RULES and makes reference to the COUNCIL REGULATION (EC) No 889/2008.

Legend: C = in COMPLIANCE with EU-norm / C-A = ADOPTED decision of the EU-COMMISSION, thus in COMPLIANCE with EU-norm / E = Equivalent application / **green** highlighting = adopted and equivalent text / N/A = not applicable in third countries

Ref.		C = compliant C-A = compliance adopted E = equivalent N/A = not applicable in third countries
AES P-I	BASIC RULES	
	TITLE I AIM, SCOPE AND DEFINITIONS	
1	Article 1 Aim and scope 1. This AES provides the basis for the sustainable development of organic production while ensuring the effective functioning of the internal market, guaranteeing fair competition, ensuring consumer confidence and protecting consumer interests. It establishes common objectives and principles to underpin the rules set out under this AES concerning: (a) all stages of production, preparation and distribution of organic products and their control; (b) the use of indications referring to organic production in labelling and advertising. 2. This AES shall apply to the following products originating from agriculture, including aquaculture, where such products are placed on the market or are intended to be placed on the market: (a) live or unprocessed agricultural products; (b) processed agricultural products for use as food; (c) feed; (d) vegetative propagating material and seeds for cultivation. The products of hunting and fishing of wild animals shall not be considered as organic production.	C
2	This AES shall also apply to yeasts used as food or feed. Referring to yeasts: Beginning with 1.1.2014, this AGRECO Standard also applies to yeasts used as food or feed. In Third Countries (TCs) or cases where there are	E

	<p>technical problems to produce yeast organically, the application of this requirement of the AGRECO Standard to yeasts as food or feed can be suspended temporarily on a case by case basis on written demand by the operator and written approval by AGRECO. Nevertheless, as soon as yeast can be produced organically in the relevant TC, inspection and certification decision according to this Standard shall apply to the production of yeasts. Yeasts must not be produced by GMO or been in contact with GMO or derivatives at any time.</p>	
3	<p>3. This AES shall apply to any operator involved in activities, at any stage of production, preparation and distribution, relating to the products set out in paragraph 2.</p>	C
4	<p>Mass catering operations in TC can apply to be subject to this AES, too. In such case the processing rules apply accordingly on labelling and control of products originating from mass catering operations.</p>	E
5	<p>4. This AES shall apply without prejudice to any other national law in the relevant TC concerning products specified in this Article, such as provisions governing the production, preparation, marketing, labelling and control, including legislation on foodstuffs and animal nutrition.</p>	E
6	<p>Article 2</p> <p>Definitions</p> <p>For the purposes of this AES, the following definitions shall apply:</p> <p>(a) ‘organic production’ means the use of the production method compliant with the rules established in this AES, at all stages of production, preparation and distribution;</p> <p>(b) ‘stages of production, preparation and distribution’ means any stage from and including the primary production of an organic product up to and including its storage, processing, transport, sale or supply to the final consumer, and where relevant labelling, advertising, import, export and subcontracting activities;</p> <p>(c) ‘organic’ means coming from or related to organic production;</p> <p>(d) ‘operator’ means the natural or legal persons responsible for ensuring that the requirements of this AES are met within the organic business under their control;</p> <p>(e) ‘plant production’ means production of agricultural crop products including harvesting of wild plant products for commercial purposes;</p> <p>(f) ‘livestock production’ means the production of domestic or domesticated terrestrial animals (including insects);</p> <p>(g) the definition of ‘aquaculture’ is that given in Council Regulation (EC) No 1198/2006 of 27 July 2006 on the European Fisheries Fund;</p> <p>(h) ‘conversion’ means the transition from non organic to organic farming within a given period of time, during which the provisions concerning the organic production have been applied;</p> <p>(i) ‘preparation’ means the operations of preserving and/or processing of organic products, including slaughter and cutting for livestock products, and also packaging, labelling and/or alterations made to the labelling concerning the organic production method;</p> <p>(j) the definitions of ‘food’, ‘feed’ and ‘placing on the market’ are those given in Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety;</p>	C

	<p>(k) 'labelling' means any terms, words, particulars, trade marks, brand name, pictorial matter or symbol relating to and placed on any packaging, document, notice, label, board, ring or collar accompanying or referring to a product;</p> <p>(l) the definition of 'pre-packaged foodstuff' is that given in Article 1(3)(b) of Directive 2000/13/EC of the European Parliament and of the Council of 20 March 2000 on the approximation of the laws of the Member States relating to the labelling, presentation and advertising of foodstuffs;</p> <p>(m) 'advertising' means any representation to the public, by any means other than a label, that is intended or is likely to influence and shape attitude, beliefs and behaviours in order to promote directly or indirectly the sale of organic products;</p>	
7	<p>(n) 'competent authority' means the central authority of a Third Country competent for the organisation of official controls in the field of organic production, related to the provisions set out under this AES, or any other authority on which that competence has been conferred to;</p> <p>(o) 'control authority' means a public administrative organisation of a Third Country to which the competent authority has conferred, in whole or in part, its competence for the inspection and certification in the field of organic production, related to the provisions set out under this AES;</p>	E
8	<p>(p) 'control body' means an independent private third party carrying out inspection and certification in the field of organic production, applying a standard equivalent to this AES or in compliance or equivalence with the EU-norms; it shall also include, where appropriate, the corresponding body of a third country or the corresponding body operating in a third country;</p>	E
9	<p>(q) 'mark of conformity' means the assertion of conformity to a particular set of standards or other normative documents in the form of a mark;</p> <p>(r) the definition of 'ingredients' is that given in Article 6(4) of Directive 2000/13/EC;</p> <p>(s) the definition of 'plant protection products' is that given in Council Directive 91/414/EEC of 15 July 1991 concerning the placing of plant protection products on the market;</p> <p>(t) the definition of 'Genetically modified organism (GMO)' is that given in Directive 2001/18/EC of the European Parliament and of the Council of 12 March 2001 on the deliberate release into the environment of genetically modified organisms and repealing Council Directive 90/220/EEC and which is not obtained through the techniques of genetic modifications listed in Annex I.B of that Directive;</p> <p>(u) 'produced from GMOs' means derived in whole or in part from GMOs but not containing or consisting of GMOs;</p> <p>(v) 'produced by GMOs' means derived by using a GMO as the last living organism in the production process, but not containing or consisting of GMOs nor produced from GMOs;</p> <p>(w) the definition of 'feed additives' is that given in Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition;</p> <p>(x) 'equivalent', in describing different systems or measures, means that they are capable of meeting the same objectives and principles by applying rules which ensure the same level of assurance of conformity;</p> <p>(y) 'processing aid' means any substance not consumed as a food ingredient by itself, intentionally used in the processing of raw materials, foods or their ingredients, to fulfil a certain technological purpose during treatment or processing and which may result in</p>	C

	<p>the unintentional but technically unavoidable presence of residues of the substance or its derivatives in the final product, provided that these residues do not present any health risk and do not have any technological effect on the finished product;</p> <p>(z) the definition of 'ionising radiation' is that given in Council Directive 96/29/Euratom of 13 May 1996 laying down basic safety standards for the protection of the health of workers and the general public against the dangers arising from ionising radiation and as restricted by Article 1(2) of Directive 1999/2/EC of the European Parliament and of the Council of 22 February 1999 on the approximation of the laws of the Member States concerning foods and food ingredients treated with ionising radiation.</p> <p>(aa) 'mass catering operations' means the preparation of organic products in restaurants, hospitals, canteens and other similar food business at the point of sale or delivery to the final consumer.</p>	
	TITLE II OBJECTIVES AND PRINCIPLES FOR ORGANIC PRODUCTION	
10	<p>Article 3</p> <p>Objectives</p> <p>Organic production shall pursue the following general objectives:</p> <p>(a) establish a sustainable management system for agriculture that:</p> <p>(i) respects nature's systems and cycles and sustains and enhances the health of soil, water, plants and animals and the balance between them;</p> <p>(ii) contributes to a high level of biological diversity;</p> <p>(iii) makes responsible use of energy and the natural resources, such as water, soil, organic matter and air;</p> <p>(iv) respects high animal welfare standards and in particular meets animals' species-specific behavioural needs;</p> <p>(b) aim at producing products of high quality;</p> <p>(c) aim at producing a wide variety of foods and other agricultural products that respond to consumers' demand for goods produced by the use of processes that do not harm the environment, human health, plant health or animal health and welfare.</p>	C
11	<p>Article 4</p> <p>Overall principles</p> <p>Organic production shall be based on the following principles:</p> <p>(a) the appropriate design and management of biological processes based on ecological systems using natural resources which are internal to the system by methods that:</p> <p>(i) use living organisms and mechanical production methods;</p> <p>(ii) practice land-related crop cultivation and livestock production or practice aquaculture which complies with the principle of sustainable exploitation of fisheries;</p> <p>(iii) exclude the use of GMOs and products produced from or by GMOs with the exception of veterinary medicinal products;</p> <p>(iv) are based on risk assessment, and the use of precautionary and preventive measures, when appropriate;</p> <p>(b) the restriction of the use of external inputs. Where external inputs are required or the appropriate management practices and methods referred to in paragraph (a) do not exist, these shall be limited to:</p>	C

	<ul style="list-style-type: none"> (i) inputs from organic production; (ii) natural or naturally-derived substances; (iii) low solubility mineral fertilisers; <p>(c) the strict limitation of the use of chemically synthesised inputs to exceptional cases these being:</p> <ul style="list-style-type: none"> (i) where the appropriate management practices do not exist; and (ii) the external inputs referred to in paragraph (b) are not available on the market; or (iii) where the use of external inputs referred to in paragraph (b) contributes to unacceptable environmental impacts; <p>(d) the adaptation, where necessary, and within the framework of this AES, of the rules of organic production taking account of sanitary status, regional differences in climate and local conditions, stages of development and specific husbandry practices.</p>	
12	<p>Article 5</p> <p>Specific principles applicable to farming</p> <p>In addition to the overall principles set out in Article 4, organic farming shall be based on the following specific principles:</p> <ul style="list-style-type: none"> (a) the maintenance and enhancement of soil life and natural soil fertility, soil stability and soil biodiversity preventing and combating soil compaction and soil erosion, and the nourishing of plants primarily through the soil ecosystem; (b) the minimisation of the use of non-renewable resources and off-farm inputs; (c) the recycling of wastes and by-products of plant and animal origin as input in plant and livestock production; (d) taking account of the local or regional ecological balance when taking production decisions; (e) the maintenance of animal health by encouraging the natural immunological defence of the animal, as well as the selection of appropriate breeds and husbandry practices; (f) the maintenance of plant health by preventative measures, such as the choice of appropriate species and varieties resistant to pests and diseases, appropriate crop rotations, mechanical and physical methods and the protection of natural enemies of pests; (g) the practice of site-adapted and land-related livestock production; (h) the observance of a high level of animal welfare respecting species-specific needs; (i) the production of products of organic livestock from animals that have been raised on organic holdings since birth or hatching and throughout their life; (j) the choice of breeds having regard to the capacity of animals to adapt to local conditions, their vitality and their resistance to disease or health problems; (k) the feeding of livestock with organic feed composed of agricultural ingredients from organic farming and of natural non-agricultural substances; (l) the application of animal husbandry practices, which enhance the immune system and strengthen the natural defence against diseases, in particular including regular exercise and access to open air areas and pastureland where appropriate; (m) the exclusion of rearing artificially induced polyploid animals; 	C

	<p>(n) the maintenance of the biodiversity of natural aquatic ecosystems, the continuing health of the aquatic environment and the quality of surrounding aquatic and terrestrial ecosystems in aquaculture production;</p> <p>(o) the feeding of aquatic organisms with feed from sustainable exploitation of fisheries as defined in Article 3 of Council Regulation (EC) No 2371/2002 of 20 December 2002 on the conservation and sustainable exploitation of fisheries resources under the Common Fisheries Policy or with organic feed composed of agricultural ingredients from organic farming and of natural non-agricultural substances.</p>	
13	<p>Article 6</p> <p>Specific principles applicable to processing of organic food</p> <p>In addition to the overall principles set out in Article 4, the production of processed organic food shall be based on the following specific principles:</p> <p>(a) the production of organic food from organic agricultural ingredients, except where an ingredient is not available on the market in organic form;</p> <p>(b) the restriction of the use of food additives, of non organic ingredients with mainly technological and sensory functions and of micronutrients and processing aids, so that they are used to a minimum extent and only in case of essential technological need or for particular nutritional purposes;</p> <p>(c) the exclusion of substances and processing methods that might be misleading regarding the true nature of the product;</p> <p>(d) the processing of food with care, preferably with the use of biological, mechanical and physical methods.</p>	C
14	<p>Article 7</p> <p>Specific principles applicable to processing of organic feed</p> <p>In addition to the overall principles set out in Article 4, the production of processed organic feed shall be based on the following specific principles:</p> <p>(a) the production of organic feed from organic feed materials, except where a feed material is not available on the market in organic form;</p> <p>(b) the restriction of the use of feed additives and processing aids to a minimum extent and only in case of essential technological or zootechnical needs or for particular nutritional purposes;</p> <p>(c) the exclusion of substances and processing methods that might be misleading as to the true nature of the product;</p> <p>(d) the processing of feed with care, preferably with the use of biological, mechanical and physical methods.</p>	C
	<p>TITLE III PRODUCTION RULES</p> <p>CHAPTER 1 General production rules</p>	
15	<p>Article 8</p> <p>General requirements</p> <p>Operators shall comply with the production rules set out in this Title and with the implementing rules provided for in Article 38(a).</p>	C
16	<p>Article 9</p> <p>Prohibition on the use of GMOs</p>	C

	<p>1. GMOs and products produced from or by GMOs shall not be used as food, feed, processing aids, plant protection products, fertilisers, soil conditioners, seeds, vegetative propagating material, micro-organisms and animals in organic production.</p> <p>2. For the purpose of the prohibition referred to in paragraph 1 concerning GMOs or products produced from GMOs for food and feed, operators may rely on the labels accompanying a product or any other accompanying document, affixed or provided pursuant to Directive 2001/18/EC, Regulation (EC) 1829/2003 of the European Parliament and the Council of 22 September 2003 on genetically modified food and feed or Regulation (EC) 1830/2003 concerning the traceability and labelling of genetically modified organisms and the traceability of food and feed products produced from genetically modified organisms.</p> <p>Operators may assume that no GMOs or products produced from GMOs have been used in the manufacture of purchased food and feed products when the latter are not labelled, or accompanied by a document, pursuant to those Regulations, unless they have obtained other information indicating that labelling of the products in question is not in conformity with those Regulations.</p> <p>3. For the purpose of the prohibition referred to in paragraph 1, with regard to products not being food or feed, or products produced by GMOs, operators using such non-organic products purchased from third parties shall require the vendor to confirm that the products supplied have not been produced from or by GMOs.</p>	
17	<p>4. The Commission of the European Union shall decide on measures implementing the prohibition on the use of GMOs and products produced from or by GMOs in accordance with the procedure referred to in Article 37(2). In such case the decision will be adopted and binding for operators in Third Countries.</p>	C-A
18	<p>Article 10</p> <p>Prohibition on the use of ionising radiation</p> <p>The use of ionising radiation for the treatment of organic food or feed, or of raw materials used in organic food or feed is prohibited.</p>	C
CHAPTER 2 Farm production		
19	<p>Article 11</p> <p>General farm production rules</p> <p>The entire agricultural holding shall be managed in compliance with the requirements applicable to organic production.</p> <p>However, in accordance with specific conditions to be laid down in accordance with the procedure referred to in Article 37(2), a holding may be split up into clearly separated units or aquaculture production sites which are not all managed under organic production. As regards animals, different species shall be involved. As regards aquaculture the same species may be involved, provided that there is adequate separation between the production sites. As regards plants, different varieties that can be easily differentiated shall be involved.</p> <p>Where, in accordance with the second subparagraph, not all units of a holding are used for organic production, the operator shall keep the land, animals, and products used for, or produced by, the organic units separate from those used for, or produced by, the non-organic units and keep adequate records to show the separation.</p>	C
20	<p>Article 12</p> <p>Plant production rules</p>	C

	<p>1. In addition to the general farm production rules laid down in Article 11, the following rules shall apply to organic plant production:</p> <p>(a) organic plant production shall use tillage and cultivation practices that maintain or increase soil organic matter, enhance soil stability and soil biodiversity, and prevent soil compaction and soil erosion;</p> <p>(b) the fertility and biological activity of the soil shall be maintained and increased by multiannual crop rotation including legumes and other green manure crops, and by the application of livestock manure or organic material, both preferably composted, from organic production;</p> <p>(c) the use of biodynamic preparations is allowed;</p> <p>(d) in addition, fertilisers and soil conditioners may only be used if they have been authorised for use in organic production under Article 16;</p> <p>(e) mineral nitrogen fertilisers shall not be used;</p> <p>(f) all plant production techniques used shall prevent or minimise any contribution to the contamination of the environment;</p> <p>(g) the prevention of damage caused by pests, diseases and weeds shall rely primarily on the protection by natural enemies, the choice of species and varieties, crop rotation, cultivation techniques and thermal processes;</p> <p>(h) in the case of an established threat to a crop, plant protection products may only be used if they have been authorised for use in organic production under Article 16;</p> <p>(i) for the production of products other than seed and vegetative propagating material only organically produced seed and propagating material shall be used. To this end, the mother plant in the case of seeds and the parent plant in the case of vegetative propagating material shall have been produced in accordance with the rules laid down in this AES for at least one generation, or, in the case of perennial crops, two growing seasons;</p> <p>(j) products for cleaning and disinfection in plant production shall be used only if they have been authorised for use in organic production under Article 16.</p> <p>2. The collection of wild plants and parts thereof, growing naturally in natural areas, forests and agricultural areas is considered an organic production method provided that:</p> <p>(a) those areas have not, for a period of at least three years before the collection, received treatment with products other than those authorised for use in organic production under Article 16;</p> <p>(b) the collection does not affect the stability of the natural habitat or the maintenance of the species in the collection area.</p> <p>3. The measures necessary for the implementation of the production rules contained in this Article shall be adopted in accordance with the procedure referred to in Article 37(2).</p>	
21	<p>Article 13</p> <p>Production rules for seaweed</p> <p>1. The collection of wild seaweeds and parts thereof, growing naturally in the sea, is considered as an organic production method provided that:</p> <p>(a) the growing areas are of high ecological quality to which the criteria as defined by Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy and, pending its implementation, of a quality equivalent to designated waters under Directive 2006/113/EC of the European Parliament and of the Council of 12 December 2006 on</p>	C-A

	<p>the quality required of shellfish waters have been adopted, and are not unsuitable from a health point of view. Pending more detailed rules to be introduced in implementing legislation, wild edible seaweeds shall not be collected in areas which would not meet the criteria for Class A or Class B areas to which the criteria as defined in Annex II of Regulation (EC) No 854/2004 of the European Parliament and of the Council of 29 April 2004 laying down specific rules for the organisation of official controls on products of animal origin intended for human consumption have been adopted;</p>	
22	<p>(b) the collection does not affect the long term stability of the natural habitat or the maintenance of the species in the collection area.</p> <p>2. The farming of seaweeds shall take place in coastal areas with environmental and health characteristics at least equivalent to those outlined in paragraph 1 in order to be considered organic. In addition to this:</p> <p>(a) sustainable practices shall be used in all stages of production, from collection of juvenile seaweed to harvesting;</p> <p>(b) to ensure that a wide gene-pool is maintained, the collection of juvenile seaweed in the wild should take place on a regular basis to supplement indoor culture stock;</p> <p>(c) fertilisers shall not be used except in indoor facilities and only if they have been authorised for use in organic production for this purpose under Article 16.</p> <p>3. The measures necessary for the implementation of production rules contained in this Article shall be adopted in accordance with the procedure referred to in Article 37(2).</p>	C
23	<p>Article 14</p> <p>Livestock production rules</p> <p>1. In addition to the general farm production rules laid down in Article 11, the following rules shall apply to livestock production:</p> <p>(a) with regard to the origin of the animals:</p> <p>(i) organic livestock shall be born and raised on organic holdings;</p> <p>(ii) for breeding purposes, non-organically raised animals may be brought onto a holding under specific conditions. Such animals and their products may be deemed organic after compliance with the conversion period referred to in Article 17(1)(c);</p> <p>(iii) animals existing on the holding at the beginning of the conversion period and their products may be deemed organic after compliance with the conversion period referred to in Article 17(1)(c);</p> <p>(b) with regard to husbandry practices and housing conditions:</p> <p>(i) personnel keeping animals shall possess the necessary basic knowledge and skills as regards the health and the welfare needs of the animals;</p> <p>(ii) husbandry practices, including stocking densities, and housing conditions shall ensure that the developmental, physiological and ethological needs of animals are met;</p> <p>(iii) the livestock shall have permanent access to open air areas, preferably pasture, whenever weather conditions and the state of the ground allow this unless restrictions and obligations related to the protection of human and animal health are imposed on the basis of Community legislation;</p> <p>(iv) the number of livestock shall be limited with a view to minimising overgrazing, poaching of soil, erosion, or pollution caused by animals or by the spreading of their manure;</p>	C

- (v) organic livestock shall be kept separate from other livestock. However, grazing of common land by organic animals and of organic land by non-organic animals is permitted under certain restrictive conditions;
- (vi) tethering or isolation of livestock shall be prohibited, unless for individual animals for a limited period of time, and in so far as this is justified for safety, welfare or veterinary reasons;
- (vii) duration of transport of livestock shall be minimised;
- (viii) any suffering, including mutilation, shall be kept to a minimum during the entire life of the animal, including at the time of slaughter;
- (ix) apiaries shall be placed in areas which ensure nectar and pollen sources consisting essentially of organically produced crops or, as appropriate, of spontaneous vegetation or non-organically managed forests or crops that are only treated with low environmental impact methods. Apiaries shall be kept at sufficient distance from sources that may lead to the contamination of beekeeping products or to the poor health of the bees;
- (x) hives and materials used in beekeeping shall be mainly made of natural materials;
- (xi) the destruction of bees in the combs as a method associated with the harvesting of beekeeping products is prohibited;
- (c) with regard to breeding:
- (i) reproduction shall use natural methods. Artificial insemination is however allowed;
- (ii) reproduction shall not be induced by treatment with hormones or similar substances, unless as a form of veterinary therapeutic treatment in case of an individual animal;
- (iii) other forms of artificial reproduction, such as cloning and embryo transfer, shall not be used;
- (iv) appropriate breeds shall be chosen. The choice of breeds shall also contribute to the prevention of any suffering and to avoiding the need for the mutilation of animals;
- (d) with regard to feed:
- (i) primarily obtaining feed for livestock from the holding where the animals are kept or from other organic holdings in the same region;
- (ii) livestock shall be fed with organic feed that meets the animal's nutritional requirements at the various stages of its development. A part of the ration may contain feed from holdings which are in conversion to organic farming;
- (iii) with the exception of bees, livestock shall have permanent access to pasture or roughage;
- (iv) non organic feed materials from plant origin, feed materials from animal and mineral origin, feed additives, certain products used in animal nutrition and processing aids shall be used only if they have been authorised for use in organic production under Article 16;
- (v) growth promoters and synthetic amino-acids shall not be used;
- (vi) suckling mammals shall be fed with natural, preferably maternal, milk;
- (e) with regard to disease prevention and veterinary treatment:
- (i) disease prevention shall be based on breed and strain selection, husbandry management practices, high quality feed and exercise, appropriate stocking density and adequate and appropriate housing maintained in hygienic conditions;
- (ii) disease shall be treated immediately to avoid suffering to the animal; chemically synthesised allopathic veterinary medicinal products including antibiotics may be used

	<p>where necessary and under strict conditions, when the use of phytotherapeutic, homeopathic and other products is inappropriate. In particular restrictions with respect to courses of treatment and withdrawal periods shall be defined;</p> <p>(iii) the use of immunological veterinary medicines is allowed;</p> <p>(iv) treatments related to the protection of human and animal health imposed on the basis of Community legislation shall be allowed;</p> <p>(f) with regard to cleaning and disinfection, products for cleaning and disinfection in livestock buildings and installations, shall be used only if they have been authorised for use in organic production under Article 16.</p> <p>2. The measures and conditions necessary for the implementation of the production rules contained in this Article shall be adopted in accordance with the procedure referred to in Article 37(2).</p>	
24	<p>Article 15</p> <p>Production rules for aquaculture animals</p> <p>1. In addition to the general farm production rules laid down in Article 11, the following rules shall apply to aquaculture animal production:</p> <p>(a) with regard to the origin of the aquaculture animals:</p> <p>(i) organic aquaculture shall be based on the rearing of young stock originating from organic broodstock and organic holdings;</p> <p>(ii) when young stock from organic broodstock or holdings are not available, non-organically produced animals may be brought onto a holding under specific conditions;</p> <p>(b) with regard to husbandry practices:</p> <p>(i) personnel keeping animals shall possess the necessary basic knowledge and skills as regards the health and the welfare needs of the animals;</p> <p>(ii) husbandry practices, including feeding, design of installations, stocking densities and water quality shall ensure that the developmental, physiological and behavioural needs of animals are met;</p> <p>(iii) husbandry practices shall minimise negative environmental impact from the holding, including the escape of farmed stock;</p> <p>(iv) organic animals shall be kept separate from other aquaculture animals;</p> <p>(v) transport shall ensure that the welfare of animals is maintained;</p> <p>(vi) any suffering of the animals including the time of slaughtering shall be kept to a minimum;</p> <p>(c) with regard to breeding:</p> <p>(i) artificial induction of polyploidy, artificial hybridisation, cloning and production of monosex strains, except by hand sorting, shall not be used;</p> <p>(ii) the appropriate strains shall be chosen;</p> <p>(iii) species-specific conditions for broodstock management, breeding and juvenile production shall be established;</p> <p>(d) with regard to feed for fish and crustaceans:</p> <p>(i) animals shall be fed with feed that meets the animal's nutritional requirements at the various stages of its development;</p> <p>(ii) the plant fraction of feed shall originate from organic production and the feed fraction derived from aquatic animals shall originate from sustainable exploitation of fisheries;</p>	C

	<p>(iii) in the case of non-organic feed materials from plant origin, feed materials from animal and mineral origin, feed additives, certain products used in animal nutrition and processing aids shall be used only if they have been authorised for use in organic production under Article 16;</p> <p>(iv) growth promoters and synthetic amino-acids shall not be used;</p> <p>(e) with regard to bivalve molluscs and other species which are not fed by man but feed on natural plankton:</p> <p>(i) such filter-feeding animals shall receive all their nutritional requirements from nature except in the case of juveniles reared in hatcheries and nurseries;</p>	
25	<p>(ii) they shall be grown in waters to which the criteria for Class A or Class B areas as defined in Annex II of Regulation (EC) No 854/2004 have been adopted</p> <p>(iii) the growing areas shall be of high ecological quality to which the criteria as defined by Directive 2000/60/EC and, pending its implementation of a quality equivalent to designated waters under Directive 2006/113/EC have been adopted.</p>	<p>C-A</p> <p>C-A</p>
26	<p>(f) with regard to disease prevention and veterinary treatment:</p> <p>(i) disease prevention shall be based on keeping the animals in optimal conditions by appropriate siting, optimal design of the holdings, the application of good husbandry and management practices, including regular cleaning and disinfection of premises, high quality feed, appropriate stocking density, and breed and strain selection;</p> <p>(ii) disease shall be treated immediately to avoid suffering to the animal; chemically synthesised allopathic veterinary medicinal products including antibiotics may be used where necessary and under strict conditions, when the use of phytotherapeutic, homeopathic and other products is inappropriate. In particular restrictions with respect to courses of treatment and withdrawal periods shall be defined;</p> <p>(iii) the use of immunological veterinary medicines is allowed;</p> <p>(iv) treatments related to the protection of human and animal health imposed on the basis of Community legislation shall be allowed.</p> <p>(g) With regard to cleaning and disinfection, products for cleaning and disinfection in ponds, cages, buildings and installations, shall be used only if they have been authorised for use in organic production under Article 16.</p> <p>2. The measures and conditions necessary for the implementation of the production rules contained in this Article shall be adopted in accordance with the procedure referred to in Article 37(2).</p>	C
27	<p>Article 16</p> <p>Products and substances used in farming and criteria for their authorisation</p> <p>Referring to products and substances used in farming and criteria for their authorisation, the AES adopts the relevant decisions of the Commission of the EU in compliant form, which then will be binding for operators in any TC, respecting the process set out as follows:</p> <p>1. The Commission shall, in accordance with the procedure referred to in Article 37(2), authorise for use in organic production and include in a restricted list the products and substances, which may be used in organic farming for the following purposes:</p> <p>(a) as plant protection products;</p> <p>(b) as fertilisers and soil conditioners;</p>	C-A

	<p>(c) as non-organic feed materials from plant origin, feed material from animal and mineral origin and certain substances used in animal nutrition;</p> <p>(d) as feed additives and processing aids;</p> <p>(e) as products for cleaning and disinfection of ponds, cages, buildings and installations for animal production;</p> <p>(f) as products for cleaning and disinfection of buildings and installations used for plant production, including storage on an agricultural holding.</p> <p>Products and substances contained in the restricted list may only be used in so far as the corresponding use is authorised in general agriculture in the Member States concerned in accordance with the relevant Community provisions or national provisions in conformity with Community law.</p> <p>2. The authorisation of the products and substances referred to in paragraph 1 is subject to the objectives and principles laid down in Title II and the following general and specific criteria which shall be evaluated as a whole:</p> <p>(a) their use is necessary for sustained production and essential for its intended use;</p> <p>(b) all products and substances shall be of plant, animal, microbial or mineral origin except where products or substances from such sources are not available in sufficient quantities or qualities or if alternatives are not available;</p> <p>(c) in the case of products referred to in paragraph 1(a), the following shall apply:</p> <p>(i) their use is essential for the control of a harmful organism or a particular disease for which other biological, physical or breeding alternatives or cultivation practices or other effective management practices are not available;</p> <p>(ii) if products are not of plant, animal, microbial or mineral origin and are not identical to their natural form, they may be authorised only if their conditions for use preclude any direct contact with the edible parts of the crop;</p> <p>(d) in the case of products referred to in paragraph 1(b), their use is essential for obtaining or maintaining the fertility of the soil or to fulfil specific nutrition requirements of crops, or specific soil-conditioning purposes;</p> <p>(e) in the case of products referred to in paragraph 1(c) and (d), the following shall apply:</p> <p>(i) they are necessary to maintain animal health, animal welfare and vitality and contribute to an appropriate diet fulfilling the physiological and behavioural needs of the species concerned or it would be impossible to produce or preserve such feed without having recourse to such substances;</p> <p>(ii) feed of mineral origin, trace elements, vitamins or provitamins shall be of natural origin. In case these substances are unavailable, chemically well-defined analogic substances may be authorised for use in organic production.</p>	
28	<p>3. Referring to products and substances used in farming and criteria for their authorisation, the AES adopts the relevant decisions of the Commission of the EU in compliant form, which then will be binding for operators in any TC, respecting the process set out as follows:</p> <p>(a) The Commission may, in accordance with the procedure referred to in Article 37(2), lay down conditions and limits as regards the agricultural products to which the products and substances referred to in paragraph 1 can be applied to, the application method, the dosage, the time limits for use and the contact with agricultural products and, if necessary, decide on the withdrawal of these products and substances.</p> <p>(b) Where a Member State considers that a product or substance should be added to, or withdrawn from the list referred to in paragraph 1, or that the specifications of use</p>	C-A

	<p>mentioned in subparagraph (a) should be amended, the Member State shall ensure that a dossier giving the reasons for the inclusion, withdrawal or amendments is sent officially to the Commission and to the Member States.</p> <p>Requests for amendment or withdrawal, as well as decisions thereon, shall be published.</p> <p>(c) Products and substances used before adoption of the EU-Regulation for purposes corresponding to those laid down in paragraph 1 of this Article, may continue to be used after said adoption. The Commission may in any case withdraw such products or substances in accordance with Article 37(2).</p> <p>4. Member States may regulate, within their territory, the use of products and substances in organic farming for purposes different than those mentioned in paragraph 1 provided their use is subject to objectives and principles laid down in Title II and the general and specific criteria set out in paragraph 2, and in so far as it respects Community law. The Member State concerned shall inform other Member States and the Commission of such national rules.</p> <p>5. The use of products and substances not covered under paragraph 1 and 4, and subject to the objectives and principles laid down in Title II and the general criteria in this Article, shall be allowed in organic farming.</p>	
29	<p>Article 17 Conversion</p> <p>1. The following rules shall apply to a farm on which organic production is started:</p> <p>(a) the conversion period shall start at the earliest when the operator has notified his activity to the competent authorities and subjected his holding to the control system in accordance with Article 28(1);</p> <p>(b) during the conversion period all rules established by this AES shall apply;</p> <p>(c) conversion periods specific to the type of crop or animal production shall be defined;</p> <p>(d) on a holding or unit partly under organic production and partly in conversion to organic production, the operator shall keep the organically produced and in-conversion products separate and the animals separate or readily separable and keep adequate records to show the separation;</p> <p>(e) in order to determine the conversion period referred to above, a period immediately preceding the date of the start of the conversion period, may be taken into account, in so far as certain conditions concur;</p> <p>(f) animals and animal products produced during the conversion period referred to in subparagraph (c) shall not be marketed with the indications referred to in Articles 23 and 24 used in the labelling and advertising of products.</p> <p>2. The measures and conditions necessary for the implementation of the rules contained in this Article, and in particular the periods referred to in paragraph 1(c) to (f) shall be defined in accordance with the procedure referred to in Article 37(2).</p>	C
	CHAPTER 3 Production of processed feed	
30	<p>Article 18</p> <p>General rules on the production of processed feed</p> <p>1. Production of processed organic feed shall be kept separate in time or space from production of processed non organic feed.</p> <p>2. Organic feed materials, or feed materials from production in conversion, shall not enter simultaneously with the same feed materials produced by non organic means into the composition of the organic feed product.</p>	C

	<p>3. Any feed materials used or processed in organic production shall not have been processed with the aid of chemically synthesised solvents.</p> <p>4. Substances and techniques that reconstitute properties that are lost in the processing and storage of organic feed, that correct the results of negligence in the processing or that otherwise may be misleading as to the true nature of these products shall not be used.</p> <p>5. The measures and conditions necessary for the implementation of the production rules contained in this Article shall be adopted in accordance with the procedure referred to in Article 37(2).</p>	
	CHAPTER 4 Production of processed food	
31	<p>Article 19</p> <p>General rules on the production of processed food</p> <p>1. The preparation of processed organic food shall be kept separate in time or space from non-organic food.</p> <p>2. The following conditions shall apply to the composition of organic processed food:</p> <p>(a) the product shall be produced mainly from ingredients of agricultural origin; in order to determine whether a product is produced mainly from ingredients of agricultural origin added water and cooking salt shall not be taken into account;</p> <p>(b) only additives, processing aids, flavourings, water, salt, preparations of micro-organisms and enzymes, minerals, trace elements, vitamins, as well as amino acids and other micronutrients in foodstuffs for particular nutritional uses may be used, and only in so far as they have been authorised for use in organic production in accordance with Article 21;</p>	C
32	(c) in adoption of any decision of the EU-Commission, non-organic agricultural ingredients may be used only if they have been authorised for use in organic production in accordance with Article 21 or have been provisionally authorised by a Member State of the EU.	C-A
33	<p>(d) an organic ingredient shall not be present together with the same ingredient in non-organic form or an ingredient in conversion;</p> <p>(e) food produced from in-conversion crops shall contain only one crop ingredient of agricultural origin.</p>	C
34	<p>3. Substances and techniques that reconstitute properties that are lost in the processing and storage of organic food, that correct the results of negligence in the processing of these products or that otherwise may be misleading as to the true nature of these products shall not be used.</p> <p>The measures necessary for the implementation of the production rules contained in this Article, and in particular regarding processing methods and the conditions for the provisional authorisation by Member States mentioned in paragraph 2(c), shall be adopted in accordance with the procedure referred to in Article 37(2).</p>	C
35	<p>Article 20</p> <p>General rules on the production of organic yeast</p> <p>1. For the production of organic yeast only organically produced substrates shall be used. Other products and substances may only be used in so far as they have been authorised for use in organic production in accordance with Article 21.</p>	C-A

	<p>2. Organic yeast shall not be present in organic food or feed together with non-organic yeast.</p> <p>3. Detailed production rules may be laid down in accordance with the procedure referred to in Article 37(2) and the results thereof shall be adopted and be binding for operators in TC, too.</p>	
36	<p>Article 21</p> <p>Criteria for certain products and substances in processing</p> <p>Referring to the criteria for certain products and substances in processing, the AES adopts the relevant decisions of the Commission of the EU in compliant form, which then will be binding for operators in any TC, respecting the process set out as follows:</p> <p>1. The authorisation of products and substances for use in organic production and their inclusion in a restricted list of the products and substances referred to in Article 19(2)(b) and (c) shall be subject to the objectives and principles laid down in Title II and the following criteria, which shall be evaluated as a whole:</p> <p>(i) alternatives authorised in accordance with this chapter are not available;</p> <p>(ii) without having recourse to them, it would be impossible to produce or preserve the food or to fulfil given dietary requirements provided for on the basis of the Community legislation.</p> <p>In addition, the products and substances referred to in Article 19(2)(b) are to be found in nature and may have undergone only mechanical, physical, biological, enzymatic or microbial processes, except where such products and substances from such sources are not available in sufficient quantities or qualities on the market.</p> <p>2. The Commission shall, in accordance with the procedure referred to in Article 37(2), decide on the authorisation of the products and substances and their inclusion in the restricted list referred to in paragraph 1 of this Article and lay down specific conditions and limits for their use, and, if necessary, on the withdrawal of products which then will be binding for operators in any TC.</p> <p>Where a Member State of the EU considers that a product or substance should be added to, or withdrawn from the list referred to in paragraph 1, or that the specifications of use mentioned in this paragraph should be amended, the Member State shall ensure that a dossier giving the reasons for the inclusion, withdrawal or amendments is sent officially to the Commission and to the Member States.</p> <p>Requests for amendment or withdrawal, as well as decisions thereon, shall be published.</p> <p>Products and substances used before adoption of this Regulation and falling under Article 19(2)(b) and (c) may continue to be used after the said adoption. The Commission may, in any case, withdraw such products or substances in accordance with Article 37(2), which then will be binding for operators in any TC.</p>	C-A
	<p>CHAPTER 5</p> <p>Flexibility</p>	
37	<p>Article 22</p> <p>Exceptional production rules</p> <p>Referring to Exceptional production rules, the AES adopts the relevant decisions of the Commission of the EU in compliant form, which then will be binding for operators in any TC, respecting the process set out as follows:</p>	C-A

	<p>1. The Commission may, in accordance with the procedure referred to in Article 37(2) and the conditions set out in paragraph 2 of this Article and subject to the objectives and principles laid down in Title II, provide for the granting of exceptions from the production rules laid down in Chapters 1 to 4.</p> <p>2. Exceptions as referred to in paragraph 1 shall be kept to a minimum and, where appropriate, limited in time and may only be provided for in the following cases:</p> <p>(a) where they are necessary in order to ensure that organic production can be initiated or maintained on holdings confronted with climatic, geographical or structural constraints;</p> <p>(b) where it is necessary in order to ensure access to feed, seed and vegetative propagating material, live animals and other farm inputs, where such inputs are not available on the market in organic form;</p> <p>(c) where it is necessary in order to ensure access to ingredients of agricultural origin, where such ingredients are not available on the market in organic form;</p> <p>(d) where they are necessary in order to solve specific problems related to the management of organic livestock;</p> <p>(e) where they are necessary with regard to the use of specific products and substances in the processing referred to in Article 19(2)(b) in order to ensure production of well established food products in organic form;</p> <p>(f) where temporary measures are necessary in order to allow organic production to continue or recommence in the case of catastrophic circumstances;</p> <p>(g) where it is necessary to use food additives and other substances as set out in Article 19(2)(b) or feed additives and other substances as set out in Article 16(1)(d) and such substances are not available on the market other than produced by GMOs;</p> <p>(h) where the use of food additives and other substances as set out in Article 19(2)(b) or feed additives as set out in Article 16(1)(d) is required on the basis of Community law or national law.</p> <p>3. The Commission may in accordance with the procedure referred to in Article 37(2) lay down specific conditions for the application of exceptions provided for under paragraph 1, which then will be binding for operators in any TC.</p>	
TITLE IV LABELLING		
38	<p>Article 23</p> <p>Use of terms referring to organic production</p> <p>1. For the purposes of this AES a product shall be regarded as bearing terms referring to the organic production method where, in the labelling, advertising material or commercial documents, such a product, its ingredients or feed materials are described in terms suggesting to the purchaser that the product, its ingredients or feed materials have been obtained in accordance with the rules laid down in this AES. In particular, the terms listed in the Annex, their derivatives or diminutives, such as 'bio' and 'eco', alone or combined, may be used throughout the Community and in any Community language for the labelling and advertising of products which satisfy the requirements set out under or pursuant to this AES.</p> <p>In the labelling and advertising of live or unprocessed agricultural products terms referring to the organic production method may be used only where, in addition, all the ingredients of that product have also been produced in accordance with the requirements laid down in this AES.</p>	C

39	<p>2. The terms referred to in paragraph 1 shall not be used by the operator anywhere nor in any language for the labelling, advertising and commercial documents of a product which does not satisfy the requirements set out under this AES, unless they are not applied to agricultural products in food or feed or clearly have no connection with organic production.</p>	E
40	<p>Furthermore, any terms, including terms used in trademarks, or practices used in labelling or advertising liable to mislead the consumer or user by suggesting that a product or its ingredients satisfy the requirements set out under this AES shall not be used.</p> <p>3. The terms referred to in paragraph 1 shall not be used for a product for which it has to be indicated in the labelling or advertising that it contains GMOs, consists of GMOs or is produced from GMOs according to Community provisions.</p> <p>4. As regards processed food, the terms referred to in paragraph 1 may be used:</p> <p>(a) in the sales description, provided that:</p> <p>(i) the processed food complies with Article 19;</p> <p>(ii) at least 95 % by weight, of its ingredients of agricultural origin are organic;</p> <p>(b) only in the list of ingredients, provided that the food complies with Article 19(1), 19(2)(a), 19(2)(b) and 19(2)(d);</p> <p>(c) in the list of ingredients and in the same visual field as the sales description, provided that:</p> <p>(i) the main ingredient is a product of hunting or fishing;</p> <p>(ii) it contains other ingredients of agricultural origin that are all organic;</p> <p>(iii) the food complies with Article 19(1), 19(2)(a), 19(2)(b) and 19(2)(d).</p> <p>The list of ingredients shall indicate which ingredients are organic.</p> <p>In the case where points (b) and (c) of this paragraph apply, the references to the organic production method may only appear in relation to the organic ingredients and the list of ingredients shall include an indication of the total percentage of organic ingredients in proportion to the total quantity of ingredients of agricultural origin.</p> <p>The terms and the indication of percentage referred to in the previous subparagraph shall appear in the same colour, identical size and style of lettering as the other indications in the list of ingredients.</p>	C
41	<p>5. AGRECO shall take the measures necessary in each TC and for every operator to ensure compliance with this Article.</p>	E
42	<p>6. The Commission may in accordance with the procedure referred to in Article 37(2) adapt the list of terms set out in the Annex, which then will be adopted and be binding for operators in any TC.</p>	C-A
43	<p>Article 24</p> <p>Compulsory indications</p> <p>1. Where terms as referred to in Article 23(1) are used:</p> <p>(a) the code number referred to in Article 27(10) of the control authority or control body to which the operator who has carried out the most recent production or preparation operation is subject, shall also appear in the labelling;</p>	C

	<p>(b) the Community logo referred to in Article 25(1) as regards pre-packaged food shall also appear on the packaging;</p> <p>(c) where the Community logo is used, an indication of the place where the agricultural raw materials of which the product is composed have been farmed, shall also appear in the same visual field as the logo and shall take one of the following forms, as appropriate:</p> <ul style="list-style-type: none"> — ‘EU Agriculture’, where the agricultural raw material has been farmed in the EU, — ‘non-EU Agriculture’, where the agricultural raw material has been farmed in third countries, — ‘EU/non-EU Agriculture’, where part of the agricultural raw materials has been farmed in the Community and a part of it has been farmed in a third country. <p>The abovementioned indication ‘EU’ or ‘non-EU’ may be replaced or supplemented by a country in the case where all agricultural raw materials of which the product is composed have been farmed in that country.</p> <p>For the abovementioned ‘EU’ or ‘non-EU’ indication, small quantities by weight of ingredients may be disregarded provided that the total quantity of the disregarded ingredients does not exceed 2 % of the total quantity by weight of raw materials of agricultural origin.</p> <p>The abovementioned ‘EU’ or ‘non-EU’ indication shall not appear in a colour, size and style of lettering more prominent than the sales description of the product.</p> <p>The use of the Community logo as referred to in Article 25(1) and the indication referred to in the first subparagraph shall be optional for products imported from third countries. However, where the Community logo as referred to in Article 25(1) appears in the labelling, the indication referred to in the first subparagraph shall also appear in the labelling.</p> <p>2. The indications referred to in paragraph 1 shall be marked in a conspicuous place in such a way as to be easily visible, clearly legible and indelible.</p>	
44	<p>3. The Commission shall, in accordance with the procedure referred to in Article 37(2), lay down specific criteria as regards the presentation, composition and size of the indications referred to in paragraph 1(a) and (c) , which then will be binding for operators in any TC.</p>	C-A
45	<p>Article 25</p> <p>Organic production logos</p> <p>1. The Community organic production logo may be used in the labelling, presentation and advertising of products which satisfy the requirements set out under this AES.</p> <p>The Community logo shall not be used in the case of in-conversion products and food as referred to in Article 23(4)(b) and (c).</p> <p>2. National and private logos may be used in the labelling, presentation and advertising of products which satisfy the requirements set out under this AES.</p>	C
46	<p>3. The Commission shall, in accordance with the procedure referred to in Article 37(2), lay down specific criteria as regards presentation, composition, size and design of the Community logo, which then will be binding for operators in any TC.</p>	C-A
47	<p>Article 26</p> <p>Specific labelling requirements</p>	C-A

	<p>Referring to Specific labelling requirements, the AES adopts the relevant decisions of the Commission of the EU in compliant form, which then will be binding for operators in any TC, respecting the process set out as follows:</p> <p>The Commission shall in accordance with the procedure referred to in Article 37(2) establish specific labelling and composition requirements applicable to:</p> <p>(a) organic feed;</p> <p>(b) in-conversion products of plant origin;</p> <p>(c) vegetative propagating material and seeds for cultivation.</p>	
	TITLE V CONTROLS	
48	<p>Article 27</p> <p>Control system</p> <p>1. AGRECO shall set up a system of controls in respect of the obligations established by this AES which at least must be equivalent to Regulation (EC) No 882/2004 and shall be in compliance as far as ever possible.</p>	E
49	<p>2. In addition to the conditions laid down in Regulation (EC) No 882/2004, the control system set up under this AES shall comprise at least the application of precautionary and control measures to be adopted by the Commission in accordance with the procedure referred to in Article 37(2), which then will be binding for operators in any TC.</p>	C-A
50	<p>3. In the context of this AES the nature and frequency of the controls shall be determined on the basis of an assessment of the risk of occurrence of irregularities and infringements as regards compliance with the requirements laid down in this AES. In any case, all operators shall be subject to a verification of compliance at least once a year. This includes as well wholesalers dealing only with pre-packaged products and operators selling to the final consumer or user as described in Article 28(2).</p>	E
51	<p>4. Referring to the requirements for and the tasks of a competent authority, the AES adopts the relevant decisions and procedures of the Commission of the EU in compliant form, which then will be binding for operators in any TC, as far as applicable, respecting the process set out in Regulation (EC) N° 834/2018.</p>	C-A
52	<p>Article 28</p> <p>Adherence to the control system</p> <p>1. Any operator who produces, prepares, stores, or imports from a third country or exports to a third country or to the EU products in the meaning of Article 1(2) or who places such products on the market shall, prior to placing on the market of any products as organic or in conversion to organic:</p> <p>(a) notify his activity to AGRECO when decision has been taken to enter the control system of AGRECO;</p> <p>(b) submit his undertaking to the control system referred to in Article 27.</p>	E
53	<p>Where an operator contracts out any of the activities to a third party, that operator shall nonetheless be subject to the requirements referred to in points (a) and (b), and the subcontracted activities shall be subject to the control system.</p>	C
54	<p>2. AGRECO may exempt from the application of this Article operators who sell products directly to the final consumer or user provided they do not produce, prepare, store other</p>	E

	than in connection with the point of sale or import such products from a third country or have not contracted out such activities to a third party.	
55	3. AGRECO shall be the body for the reception of such notifications.	E
56	4. AGRECO shall ensure that any operator who complies with the rules of this AES, and who pays a reasonable fee as a contribution to the control expenses, is entitled to be covered by the control system.	E
57	5. AGRECO shall keep an updated list containing the names and addresses of operators under their control. This list shall be made available to the interested parties.	E
58	6. The Commission, in accordance with the procedure referred to in Article 37(2), shall adopt implementing rules to provide details of the notification and submission procedure referred to in paragraph 1 of this Article in particular with regard to the information included in the notification referred to in paragraph 1(a) of this Article, which then will be binding for any operator in any TC.	C-A
59	<p>Article 29</p> <p>Documentary evidence</p> <p>1. AGRECO shall provide documentary evidence to any such operator who is subject to their controls and who in the sphere of his activities, meets the requirements laid down in this AES. The documentary evidence shall at least permit the identification of the operator and the type or range of products as well as the period of validity.</p> <p>With regard to group certification and contract growing in TCs, the documentation of the certification decision on level of the individual supplier is given by a "certification list", as an integral part of the master certificate, issued to the leading contractual partner managing the project resp. the organization.</p>	E E
60	2. The operator shall verify the documentary evidence of his suppliers.	C
61	3. For operators in TC, the form of the documentary evidence referred to in paragraph 1 shall be as close as possible to the form drawn up in accordance with the procedure referred to in Article 37(2), taking into account the advantages of electronic certification.	E
62	<p>Article 30</p> <p>Measures in case of infringements and irregularities</p> <p>1. Where an irregularity is found as regards compliance with the requirements laid down in this AES, AGRECO shall ensure that no reference to the organic production method is made in the labelling and advertising of the entire lot or production run affected by this irregularity, where this would be proportionate to the relevance of the requirement that has been violated and to the nature and particular circumstances of the irregular activities.</p> <p>Where a severe infringement or an infringement with prolonged effect is found, AGRECO shall prohibit the operator concerned from marketing products which refer to the organic production method in the labelling and advertising for a period to be agreed within the Regulatory Committee of AGRECO.</p>	E
63	2. Information on cases of irregularities or infringements affecting the organic status of a product shall be immediately communicated between the control bodies, control authorities, competent authorities and Member States concerned and, where appropriate, to the Commission.	C

	The level of communication shall depend on the severity and the extent of the irregularity or infringement found.	
64	The Commission may, in accordance with the procedure referred to in Article 37(2), lay down specifications regarding the form and modalities of such communications. which then will be binding for any operator in any TC.	C-A
65	Article 31 Exchange of information Upon a request duly justified by the necessity to guarantee that a product has been produced in accordance with this AES, the competent authorities, control authorities and the control bodies shall exchange relevant information on the results of their controls with other competent authorities, control authorities and control bodies. They may also exchange such information on their own initiative.	C
	TITLE VI TRADE WITH OTHER THIRD COUNTRIES	
66	Article 32 Import of compliant products 1. A product imported from another third country may be sold by the operator as organic provided that:	E
67	(a) the product complies with the provisions set out in Titles II, III and IV as well as with the implementing rules affecting its production adopted pursuant to this AES ;	E
68	(b) all operators, including the exporters, have been subject to control by a control authority or control body recognised in accordance with paragraph 2;	C
69	(c) the operators concerned shall be able to provide at any time, to the importers and to AGRECO , documentary evidence as referred to in Article 29, permitting the identification of the operator who carried out the last operation and the verification of compliance by that operator with points (a) and (b), issued by the control authority or control body referred to in point (b).	E
70	2. The Commission shall, in accordance with the procedure referred to in Article 37(2), recognise the control authorities and control bodies referred to in paragraph 1(b) of this Article, including control authorities and control bodies as referred to in Article 27, which are competent to carry out controls and to issue the documentary evidence referred to in paragraph 1(c) of this Article in third countries, and establish a list of these control authorities and control bodies, which then will be adopted and be binding for any operator in any TC.	C-A
71	Referring to the accreditation of control bodies in TCs, working in compliance to EU norms, the AES adopts the relevant decisions of the Commission of the EU in compliant form, which then will be binding for operators in any TC, respecting the process set out as follows: The control bodies shall be accredited to the most recently notified version, by a publication in the C series of the Official Journal of the European Union, of European Standard EN 45011 or ISO Guide 65 (General requirements for bodies operating product certification systems). The control bodies shall undergo regular on-the-spot evaluation, surveillance and multiannual re-assessment of their activities by the accreditation body.	C-A

	<p>When examining requests for recognition, the Commission shall invite the control authority or control body to supply all the necessary information. The Commission may also entrust experts with the task of examining on-the-spot the rules of production and the control activities carried out in the third country by the control authority or control body concerned.</p> <p>The recognised control bodies or control authorities shall provide the assessment reports issued by the accreditation body or, as appropriate, the competent authority on the regular on-the-spot evaluation, surveillance and multiannual re-assessment of their activities.</p> <p>Based on the assessment reports, the Commission assisted by the Member States shall ensure appropriate supervision of the recognised control authorities and control bodies by regularly reviewing their recognition. The nature of the supervision shall be determined on the basis of an assessment of the risk of the occurrence of irregularities or infringements of the provisions set out in this AES.</p>	
72	<p>Article 33</p> <p>Import of products providing equivalent guarantees</p> <p>1. A product imported from a third country may also be sold by the operator as organic provided that:</p>	E
73	(a) the product has been produced in accordance with production rules equivalent to those referred to in Titles III and IV;	C
74	(b) the operators have been subject to control measures of equivalent effectiveness to those referred to in Title V and such control measures have been permanently and effectively applied;	C
75	(c) the operators at all stages of production, preparation and distribution in the third country have submitted their activities to a control system recognised in accordance with paragraph 2 or to a control authority or control body recognised in accordance with paragraph 3;	C
76	(d) the product is covered by a certificate of inspection issued by the competent authorities, control authorities or control bodies of the third country recognised in accordance with paragraph 2, or by a control authority or control body recognised in accordance with paragraph 3, which confirms that the product satisfies the conditions set out in this paragraph.	C
77	The original of the certificate referred to in this paragraph shall accompany the goods to the premises of the first consignee; thereafter the importer must keep the certificate at the disposal of the control authority or the control body for not less than two years.	C
78	<p>Referring to the accreditation of control bodies in TCs, working in equivalence to EU norms, the AES adopts the relevant decisions of the Commission of the EU in compliant form, which then will be binding for operators in any TC, respecting the process set out as follows:</p> <p>2. The Commission may, in accordance with the procedure referred to in Article 37(2), recognise the third countries whose system of production complies with principles and production rules equivalent to those laid down in Titles II, III and IV and whose control measures are of equivalent effectiveness to those laid down in Title V, and establish a list of these countries. The assessment of equivalency shall take into account Codex Alimentarius guidelines CAC/GL 32.</p>	C-A

	<p>When examining requests for recognition, the Commission shall invite the third country to supply all the necessary information. The Commission may entrust experts with the task of examining on-the-spot the rules of production and the control measures of the third country concerned.</p> <p>By 31 March of each year, the recognised third countries shall send a concise annual report to the Commission regarding the implementation and the enforcement of the control measures established in the third country.</p> <p>Based on the information in these annual reports, the Commission assisted by the Member States ensures appropriate supervision of the recognised third countries by regularly reviewing their recognition. The nature of the supervision shall be determined on the basis of an assessment of the risk of the occurrence of irregularities or infringements of the provisions set out in the Regulation (EC) N° 834/2007.</p> <p>3. For products not imported under Article 32 and not imported from a third country which is recognised under paragraph 2 of this Article, the Commission may, in accordance with the procedure referred to in Article 37(2), recognise the control authorities and control bodies, including control authorities and control bodies as referred to in Article 27, competent to carry out controls and issue certificates in third countries for the purpose of paragraph 1, and establish a list of these control authorities and control bodies. The assessment of equivalency shall take into account Codex Alimentarius guidelines CAC/GL 32.</p> <p>The Commission shall examine any request for recognition lodged by a control authority or control body in a third country.</p> <p>When examining requests for recognition, the Commission shall invite the control authority or control body to supply all the necessary information. The control body or the control authority shall undergo regular on-the-spot evaluation, surveillance and multiannual re-assessment of their activities by an accreditation body or, as appropriate, by a competent authority. The Commission may also entrust experts with the task of examining on-the-spot the rules of production and the control measures carried out in the third country by the control authority or control body concerned.</p> <p>The recognised control bodies or control authorities shall provide the assessment reports issued by the accreditation body or, as appropriate, the competent authority on the regular on-the-spot evaluation, surveillance and multiannual re-assessment of their activities.</p> <p>Based on these assessment reports, the Commission assisted by the Member States shall ensure appropriate supervision of recognised control authorities and control bodies by regularly reviewing their recognition. The nature of the supervision shall be determined on the basis of an assessment of the risk of the occurrence of irregularities or infringements of the provisions set out in the Regulation (EC) N° 834/2007.</p>	
TITLE VII FINAL AND TRANSITIONAL RULES		
79	<p>Article 34</p> <p>Free movement of organic products</p> <p>1. AGRECO may not, on grounds relating to the method of production, to the labelling or to the presentation of that method, prohibit or restrict the marketing of organic products controlled by another control authority or control body located in another Third Country or State, in so far as those products are duly certified to and meet the requirements of the EU norms in compliant or equivalent form. In particular, no additional controls or financial burdens in addition to those foreseen in Title V of this AES may be imposed.</p> <p>2. Third Countries may apply stricter rules within their territory to organic plant and livestock production, where these rules are also applicable to non-organic production</p>	E

	and provided that they are in conformity or equivalence with Community law and do not prohibit or restrict the marketing of organic products produced outside the territory of the Third Country concerned.	
80	<p>Article 35</p> <p>Transmission of information to the Commission</p> <p>Referring to the Transmission of information to the Commission, the AES adopts the relevant procedures and requirements of the Commission of the EU in compliant form, which then will be binding for the activities of AGRECO whenever applicable in any TC, respecting the process set out as follows:</p> <p>AGRECO shall regularly transmit the information required by the Commission to the Commission.</p>	C-A
81	<p>Article 36</p> <p>Statistical information</p> <p>Referring to the Statistical information, the AES adopts the relevant procedures and requirements of the Commission of the EU in compliant form, which then will be binding for the activities of AGRECO whenever applicable in any TC, respecting the process set out as follows:</p> <p>AGRECO shall transmit to the Commission the statistical information necessary for the implementation and follow-up of the Regulation (EC) N° 834/2007. This statistical information shall be defined within the context of the Community Statistical Programme.</p>	C-A
82	<p>Article 37</p> <p>Committee on organic production</p> <p>Referring to the Committee on organic production, the AES adopts the relevant procedures and requirements of the Commission of the EU in equivalent form, which then will be binding for the activities of AGRECO whenever applicable in any TC, respecting the process set out as follows:</p> <ol style="list-style-type: none"> 1. The Commission shall be assisted by a regulatory Committee on organic production. 2. Where reference is made to this paragraph, Articles 5 and 7 of Decision 1999/468/EC shall apply. <p>The period provided for in Article 5(6) of Decision 1999/468/EC shall be set at three months.</p>	C-A
83	3. In addition, AGRECO shall run a regulatory Committee on organic production, in order to be assisted in regulatory cases and standard setting. This Committee shall work in the framework of the EU legislation on organic agriculture.	E
84	This AES shall be binding in its entirety and directly applicable in all Third Countries . It is valid from the respective date of release of the document .	E
